I study engineering at the University of Auckland. Over the summer, I am trying to secure an engineering internship to further my work experience. I am a passionate and hardworking person, with a love of science, art and music. I am originally from Hawkes Bay and went to [Woodford House](#), a boarding school in Havelock North, which I was a boarder at for seven years.

This experience gave me great independence and has made me accustomed to tenancy, enforcing essential habits such as cleanliness, tidiness and respect for property. For my first year, I've been enjoying halls, and I am excited to move into a flat to further immerse myself in the Auckland lifestyle.

I am a student at the University of Auckland, where I am studying Computer Science. I am passionate about my course as it gives me the ability to be creative while exploring my love of science. I am excited for my career ahead and look forward to the opportunities in the field. I am particularly interested in [CERN](#), a well renowned global research organisation. In my spare time, I enjoy tramping, art and design.

I have lived in South Auckland most of my life, attending [ACG Strathallan College](#) up until last year. In my final year at ACG Strathallan, I went on a trip to the Silk Route with [World Challenge](#). This involved planning and constructing classrooms and wells for a small village in the area; giving me valuable management skills and independence. I believe these values I gained, along with being respectable, dependable and tidy, would make me a great tenant. I currently work part-time at MFI Engineering and MFI Compliance in Wiri, Manukau.

I moved to New Zealand 3 years ago and I absolutely love this country and the beautiful nature it has. I currently study Nursing at the University of Auckland, while working part-time in the city at Gong Cha. I love music and dancing because I can express myself through these devices. I attended [Wellington College](#) before moving to Auckland for university. I did First Aid in high school, which I was very passionate about. I assisted the school nurse, Robyn, in admitting the school students and taking care of them. I also helped Robyn restock and prescribe common medications under her supervision. I find this extremely helpful since I want to become a nurse in the future.

As I'm studying Nursing, it is important for me to start practicing and demonstrating my professionalism. By disciplining myself to be prudent, honest, tidy, punctual and well-mannered to become a registered nurse, I believe I would be a good tenant.
